BABIES WANTED BY HONOLULU CITIZENS

That the demand for babies in Honolulu is greater than the supply is the report of a committee composed of several ladies who have undertaken to look up homes for young children who have either been orphaned or who have appeared before the juvenile court. There are now more than a dozen homes on the waiting list looking for a chance to adopt a healthy boy or girl, but at present children, for adoption purposes, are scarce.

The investigating committee was appointed some months ago at the request of the juvenile court, to work in conjunction with that court and various charitable institutions throughout the city.

The members of the committee took it upon themselves to investigate the claims of those who wished to adopt babies, and also to see that the children were disposed of by the authorities and placed in good hands.

The pitiful tales of treatment at the hands of drunken parents which are told from time to time before the court of Judge Whitney have aroused to action these ladies who have generously offered their services, and already a number of children have been placed in local homes.

HANAN'S YACHT ON PACIFIC CRUISE

John H. Hanan, multi-millionaire shoe manufacturer, who was enrolled as a round-the-world tourist with the large company passing through Honolulu in the Hamburg-American excursion steamer Cleveland, then declared that he had become so completely enamored with travel in the placid waters of the Pacific that he intended to bring his private yacht for an extended cruise. The wealthy business man has carried his threat into execution, and when the Japanese liner Buoy Maru was making the rounds of the China and Japanese ports, the splendid high-powered and fleet yacht was expected would make an extended stay in the Philippine Islands before setting out in the Pacific, in the direction of the mainland.

John H. Hanan was for several years president of the Boot and Shoe Manufacturers' Association in the United States, and it was he who called a meeting of the business men aboard the Cleveland, immediately after the departure of that vessel from Honolulu in which meeting a set of resolutions were drafted and mailed to the United States where they would do the most good.

DIGITALIS AND BRIGHT'S DISEASE

There are more cases of Bright's Disease on Digitalis and Basham's Mixture than anything else. One is for the heart and the other is an iron tonic. Yet if the case is chronic the books admit the outcome will be failure.

Then why give them? Because there is nothing in the pharmacopoeia to counteract degeneration in the kidneys, which is the real trouble and by holding up the heart and giving a tonic the patient may last a little longer.

But is it not clear that if an agent has been worked out that counteracts renal degeneration and thus prevents the escape of albumen that there is hope? That is the motive of Fulton's Renal Compound, a new result not reached by the pharmacopoeia. That it gets this result can be proven by chemists with a little Picric and Citric acid.

We know of no chronic cases recovering under Digitalis and Basham's Mixture without Fulton's Renal Compound but thousands are getting results under the Renal Compound without Digitalis or Basham's Mixture. But they can be continued if necessary. There is no conflict.

If you have Bright's Disease you owe it to yourself and family to try Fulton's Renal Compound before giving up. It can be had at Honolulu Drug Co.

Ask for pamphlet on our investigation into the curability of Bright's Disease, or write John J. Fulton Co., San Francisco.—advertisement.

MOTHER AND SON ARE TO REST TOGETHER IN LAST LONG SLEEP

In a flower lined grave beside that of her son, the late Ernest Mueller, who died in this city last week, the body of Mrs. Anna Mueller was laid at rest in the Nuuanu cemetery at three o'clock this afternoon. The son preceded his mother to the grave by only a few days, she being with him when the end came. Mrs. Mueller had been ill for some weeks, and a night day following the death of her son, passed away. The remains of mother and son, each in a handsome casket, have been at Silva's undertaking parlors, from which place the funeral was held.

Relief for Sufferers.

Stubborn attacks of dysentery which defy other treatment yield promptly to Chamberlain's Colic, Cholera and Diarrhoea Remedy. It always gives relief. For sale by all dealers. Benson, Smith & Co., agents for Hawaii.

Mothers of Boy Scouts — and the Scouts themselves — are following the arrow to Ye Regal Boot Shop to get some of those new shoes for Boy Scouts. Has your boy been fitted?

CHINESE DEMAND ADMISSION HERE

With the intention of pressing the demand that Chinese be permitted to enter the Philippines and other insular dependencies of the United States, Benito Sy Cong Bien, a millionaire business and steamship man in the Philippines, with headquarters at Manila and Hongkong, is said to be a passenger in the Pacific Mail liner Fersia, that is due to reach Honolulu tomorrow, en route to the mainland.

Washington is the mecca for one or more prominent Chinese who expected to pass through here within the next few weeks, where, upon arrival, vigorous representation for the abrogation of the laws restricting free entry of Chinese to the Philippines, Hawaii and the Pacific Coast states will be made at the instance of the new Chinese government.

Benito Sy Cong Bien has recently spent some time at Peking before starting out on his mission to the United States.

He has had several lengthy and personal interviews with Yuan Shih-kai, president of the republic, and with Luk Ching-cheung, the minister of foreign affairs, at which the needs of the Chinese, especially in the Philippines, were discussed. Among other questions brought up was that of the restrictions placed on Chinese immigrants. He also said that on behalf of the Chinese in those islands, as represented by the Chinese chamber of commerce in Manila, a petition was submitted to the Chinese government requesting that proper representations be made to the Washington government with a view to remove the restrictions now placed on Chinese immigration into the islands.

Mr. Sy Cong Bien declared before leaving on his important mission that not only the president of the republic but also a great number of other highly placed and influential Chinese were in entire sympathy with their countrymen in the Philippines on the immigration question, that they had promised him that the matter would be given due consideration and that as soon as convenient it would be taken up with the Washington authorities. He also said that while at Peking he had a personal interview with Mr. Calhoun, the American minister to China, at which he explained to the American representative the feelings of the Chinese on the discriminations made against them by the United States government.

WALTER G. SMITH'S LECTURE IS PRAISED

Says the Miami, Florida, Herald: "The Herald would urge upon the people of Miami the duty of attending the lecture to be given tonight at the school auditorium by Hon. Walter Gifford Smith, of Honolulu.

"Mr. Smith is a gentleman of engaging personality, and he has a story to tell of the far off islands of Hawaii that will interest every listener. Mr. Smith comes to Miami for the purpose of advertising the islands, and there will be a value in the interesting lecture to Miami outside of the mere pleasure of hearing a gifted speaker address an audience on his favorite topic.

"He will give an hour's pleasure and he will also teach Miami how to advertise her own advantages to the world.

"Mr. Smith has had a large experience in his work and his illustrated lecture tonight will be a treat that none should miss. No admission fee will be charged."

COST OF PRODUCING SUGAR IN SOUTH SHOWS INCREASE

WASHINGTON, April 10.—The average cost of producing a pound of sugar in Louisiana was 4.39 cents in 1911; in 1910 it was 3.72, and in 1909 it was 3.62 cents, as shown by an investigation by the department of commerce, the result of which was made public today by Secretary Redfield. The high cost in 1911, it is explained, was due to the severe freeze, which reduced the average yield of sugar per ton of cane ground to 133 pounds that year, whereas in 1910 it was 147 pounds and in 1909 it was 156 pounds. A comparison for five years of Cuban and certain Louisiana factories is made to show that the yield in Cuba was 229.3 pounds per ton of cane and 161.9 in Louisiana. The sucrose in extraction juice was 16 per cent in Cuba and 11.5 in Louisiana.

CASTLE'S BOOK ON HAWAII GIVEN FAVORABLE NOTICE FACTS WORTH KNOWING

"Hawaii, Past and Present," by William R. Castle, Jr., is a good book for one who wishes to know of the history of the islands and of the great changes which have occurred in the last few years. Mr. Castle is not one of the tourists who writes of Hawaii after a visit of a few weeks and laborious "cranking" of the island history. He is the son of a prominent American merchant who went to Hawaii in the early days. The author was born on the islands and he writes with that sympathetic touch which comes of the familiarity of many years. He has not acquired

his facts by diligent study of books or by interviews with old residents; they are the result of loving study and observation extending over many years.

So this book impresses one as the records of many impressions, all marked by real love of the scenes and the people that are described. You will find here all the facts that can be found in any of the guide books, with much that the best of these manuals lack—that feeling which makes one see things with the author's eyes. The book is well illustrated from many photographs.—San Francisco Chronicle.

All milk in New York is to be bottled after June 1. No more loose milk of many years. He has not acquired
